Profile Summary

Flutter & Full-Stack Developer with 3+ years of experience engineering high-performance cross-platform mobile (Android/iOS), web, and desktop (macOS/Windows) applications using Flutter, Dart, React.js, and Node.js. Experienced in developing production-ready apps published on Google Play Store and Apple App Store. Skilled in building responsive UIs, integrating RESTful APIs, Firebase/Supabase services, and implementing state management using BLoC/Cubit and Redux. Recently architected MineAI - an end-to-end personal AI productivity hub with voice task extraction, multi-store price scraper, biometric encrypted vault, and Node.js microservices. Extensive experience in AI integrations (Gemini, Flowise, OpenAI), offline-first SQLite architectures, CI/CD automation, and desktop productivity software.

Core Competencies & Skills

* Languages & Frameworks: Dart, Flutter, React.js, JavaScript, Node.js (Express), HTML5, CSS3
* State Management: BLoC, Cubit, Redux, Redux Toolkit, Provider
* Backend & APIs: Node.js, Express, RESTful APIs, Firebase (Auth, Firestore, Storage, Messaging), Supabase (Auth, PostgreSQL), WebSockets
* AI & GenAI: Google Gemini API, OpenAI API, Flowise, LangChain, RAG Vector Search, OCR, Voice AI (STT/TTS)
* Web Scraping & Telemetry: Cheerio, Axios, Playwright, RSS Feeds, Background Daemons, IoT Sensor Streams
* Databases: SQLite (Sqflite), Supabase PostgreSQL, Firestore, MongoDB, flutter_secure_storage (AES-256)
* Tools & DevOps: Git, GitHub, Android Studio, VS Code, Firebase CLI, GitHub Actions CI/CD, App Signing & Distribution
* Other: Desktop Window Orchestration, Flutter Map, Video Streaming (HLS), Package Publishing (pub.dev), Push Notifications

Professional Experience

Flutter Developer ? Lumina Datamatics Pvt. Ltd. **Dec 2025 ? Present**

* Developing cross-platform Flutter desktop applications for macOS and Windows focused on eBook publishing workflows.
* Implemented XML-based content processing, transformation, and conversion pipelines for enterprise publishing formats.
* Built rich text editing features using CKEditor for structured content creation and editing within desktop interfaces.
* Designed responsive desktop UI components optimized for large-screen productivity and multi-window workflows.
* Integrated backend services for content storage, processing, and publishing automation.
* Managed application distribution through Apple TestFlight and successfully published the macOS application to Apple App Store.

Flutter Developer ? Datayaan Solutions Pvt. Ltd. **Jul 2023 ? Nov 2025**

* Developed high-performance Flutter apps with scalable clean architecture and responsive UI across Android, iOS, and desktop.
* Built complex UIs using custom widgets, FormBuilder, and Figma-based responsive design tokens.
* Integrated RESTful APIs and Firebase services (Auth, Firestore, Storage, Messaging, App Distribution) for secure real-time features.
* Used BLoC/Cubit extensively for modular structure, predictable state transitions, and improved testability.
* Implemented offline-first architecture using Sqflite with local caching, synchronization, and full CRUD operations.
* Deployed applications to Google Play Store and TestFlight with automated CI/CD pipelines, versioning, and app signing.
* Created an AI-powered assistant (Jarvis) integrating Flowise + GPT with full voice support (STT/TTS).
* Gained experience in React.js (Hooks, Redux Toolkit) and Node.js/MongoDB for full-stack service integrations.

Featured Projects

MineAI ? All-in-One Personal AI Productivity Hub *Flutter, Dart, Node.js, Express, Supabase, SQLite, Gemini AI, BLoC*

Cross-Platform: Android APK & Windows Desktop (.exe) | Direct Evaluation on Portfolio

* Architected a full-featured productivity super-app and desktop application integrated with a Node.js microservice backend.
* AI Voice Task Extraction: Built hands-free speech-to-text pipeline sending voice notes to Gemini 2.5 Flash, extracting title, category, priority, and due dates directly into local SQLite database with scheduled local alarm notifications.

* Multi-Store Price Comparison: Engineered real-time parallel web scrapers using Cheerio & Axios across Amazon, Flipkart, and Meesho, calculating best deals, savings margins, and ratings in real-time.
* City News Engine: Developed boundary-filtered RSS parser for 8 major Indian cities with editorial photo extraction.
* Encrypted Private Vault: Built biometric FaceID/Fingerprint protected safe using AES-256 client-side encryption.
* Multimedia Hub: Integrated adaptive HLS video OTT player, multimedia diary with mood poster generation, and budget tracker.
* Admin Portal: Developed dedicated Flutter Web/Desktop control dashboard for user telemetry, ticket resolution, and system health.

EnExpense ? Expense Tracking App
Flutter, Sqflite, Firebase, BLoC, OCR, CI/CD

Google Play Store ? EnExpense

* Built an offline-first personal finance app using Sqflite for local persistence and Firestore for cloud sync.
* Integrated OCR-based receipt scanning and automated category detection to eliminate manual entry friction.
* Added multi-currency support, configurable reminders, and automated PDF/Excel expense summary reports.
* Managed Play Store and TestFlight deployments including signing, versioning, and release rollouts.

Yaantrac ? Vehicle Tracking Application
Flutter, BLoC, WebSocket, Flutter Map, Charts

Google Play Store ? Yaantrac

* Implemented real-time vehicle telemetry tracking using WebSockets and Flutter Map to stream location coordinates.
* Built geofencing features with entry/exit push alerts, boundary visualization, and event audit logging.
* Designed trip history screens with custom charts and fleet management dashboards.

E-Book Publishing Desktop Application
Flutter Desktop (macOS/Windows), Dart, XML, CKEditor

Apple App Store ? macOS

* Developed cross-platform desktop publishing app supporting XML transformation and rich text editing via CKEditor.
* Published macOS desktop release to Apple App Store with automated CI/CD code-signing.

Pollution Monitoring App
Flutter, Firebase, Flutter Map, IoT Sensors

Google Play Store (Beta)

* Developed cross-platform IoT app visualizing water, air, and noise pollution telemetry with threshold breach alerts.

AI Developer ? Jarvis (Personal Project)
Flowise, LangChain, RAG, OpenAI API, Flutter

Render / Cloud

* Engineered conversational assistant with RAG-enabled PDF knowledge retrieval and speech-driven voice loop.

Education

Anna University ? Tirunelveli — **Aug 2021 ? Jun 2023**
Master of Computer Applications (MCA) ? CGPA: 7.3 — *Tirunelveli, India*

Ambai Arts College ? Ambasamudram — **Jun 2018 ? May 2021**
Bachelor of Computer Applications (BCA) ? GPA: 7.5 — *Ambasamudram, India*

Achievements & Open Source

* Currency Picker (pub.dev): Published open-source Flutter package ('currency_pick') for global currency selection with accessibility optimization.
* Flutter Automation System: Built shell automation tool (setup.sh) reducing project bootstrap time by 80% and enforcing clean architecture.
